

This is the landing page. Click Main to get to the actual content

This is the main page. Enter a tag and click submit to load images with that tag from instagram. Alternatively, enter the name of a saved mosaic and click “Get mosaic” to load the mosaic from the database.

After loading some tags your screen should look something like this

Click on a picture and you will be taken to the mosaic page. Clicking on the modification buttons will change the image accordingly, and entering a name and clicking save will save the image to the database.

This is the user page. Enter any public profile as the username, and it will load their pictures, which you can then click and make mosaics from
